Q: React material table - defining column names I'm following the instructions here and here, but neither gives a clear answer on how to use column names and not the data property in the table. Here is my code

```
const columns = [ {
  id: 'column-label', header: 'Column Label',
  dataIndex: 'column-label', width: 140, }, ]
const ColumnTable = () => { const data =
[ { column-label: 'Banks' }, { column-label:
'Entities' }, { column-label: 'Fee' }, {
  column-label: '
